SUMMARY

Enthusiastic Software Developer and B.Tech Computer Science and Engineering graduate skilled in Python, JavaScript, and SQL. Experienced in building scalable web applications, AI-based systems, and data-driven solutions. Passionate about problem-solving, clean code, and full-stack development with strong teamwork and communication skills.

EDUCATION

- **Bachelor of Technology (B.Tech.) in CSE | Vijaya Institute of Technology for Women,** *2022 – 2026*
– CGPA: 8.61
- **Intermediate Education (MPC) | Sri Chaitanya Girls Junior College,** *2020 – 2022*
– Percentage: 95%
- **Secondary Education (SSC) | Don Bosco High School,** *2019 – 2020*
– Percentage: 97%

INTERNSHIP EXPERIENCE

- **Software Development & Research Intern | Trivon Software Solutions,** *Jun. 2026 – Aug. 2026 | Paid Internship*
– Worked as a **Software Development & Research Intern**, contributing to web development, UI/UX design, and software testing.
– Designed and developed a **React.js-based HR Management Portal** for employee, candidate, attendance, payroll, performance, and certificate management.

PROJECTS

- **AI-Based Oceanographic Data Analysis System** [GitHub](#), *2026*
– Developed an AI-driven platform to analyze **oceanographic, fisheries, and biodiversity data** for environmental insights.
– Implemented **ML models** including correlation analysis and clustering for pattern discovery.
– Built a **CNN-based model** for species identification from otolith images and integrated eDNA-based species detection.
- **AI/ML Projects | Infosys Springboard & BlackBucks** [GitHub](#), *May 2024 – Nov. 2025*
– Created a **RideWise Bike Demand Prediction System** using **deep learning** techniques on hourly and daily datasets to estimate usage trends with high accuracy.
– Developed a **Weather Forecasting Model** utilizing machine learning algorithms and real-time datasets, achieving a **15% improvement** in prediction precision.
– Applied advanced **data preprocessing, feature extraction, and hyperparameter optimization** to enhance model performance and reliability.
– Implemented end-to-end pipelines using **Python, Pandas, and Scikit-learn** for data analysis, training, and visualization.

SKILLS

- **Programming Languages:** Python, SQL, JavaScript (Basics)
- **Computer Science Fundamentals:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS, Computer Networks
- **Web Technologies:** HTML5, CSS3, JavaScript, Responsive Web Design
- **Artificial Intelligence & Machine Learning:** Machine Learning, Deep Learning, Computer Vision, Generative AI, TensorFlow Lite, Scikit-learn
- **Libraries:** Pandas, NumPy, Matplotlib
- **Tools & Platforms:** Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Kaggle, Claude AI, Supabase

CERTIFICATIONS

- **Cloud & Career Skills:** IBM SkillsBuild: Professional Skills Program (2024) [Certificate](#)
- **Data Structures:** NPTEL: DSA with Python – NPTEL (2025) [Certificate](#)
